

BUILD 200902 7

Anomalie #4091 : Schedule printing: label issue

In some cases, duration bar labels are not printed

Anomalie #4088 : Description of planning not saved

when you create a schedule or import it, the description does not save, the anomaly is corrected

Anomalie #4087 : Favorite display issue

The layout is not maintained

Anomalie #4081 : Agenda view: add event

The event type does not comply with the creation rule

Anomalie #4078 : Event-Import from Database can not be created in build 200805

The database type triggers a "listener" that modifies the value of the current configuration. Therefore, the application crashes

Anomalie #4076 : ICal: no event in the stream

In some cases, events are not imported in the Ical stream

Anomalie #4075 : Favorite displays

In some cases the favorite display loses the original layout

Anomalie #4074 : Event editor: display issue

In some cases, the cancel and validate buttons are not displayed

Anomalie #4070 : VPDesk: SAML2 incompatibility

SAML2 authentication is not taken into account via VPDesk

Anomalie #4068 : Mouse scrolling issue

Pressing the ctrl key + scrolling doesn't allow to scroll in specific views

Anomalie #4067 : API V2 - Event search execution time in SQLServer

The execution time of an event search request is unusually long

Anomalie #4066 : Duplicate a unique identification heading in a form

The duplication of an event does not modify the unique identification number contained in a form

Anomalie #4060 : Summary of events with rich text in form headings

Headings with rich text are not properly taken into account in "Summary of Events" heading.

Anomalie #4059 : VPGO: Unable to read special character

In some QRcodes there is a special character that makes the JSON parser crash.

BUILD 200805 7

Anomalie #4058 : Form : single choice heading

In some cases, the empty value is lost

Anomalie #4056 : Issue when exporting heading from a parent event

In some cases, exporting headings from parent events does not work

Anomalie #4055 : VPGO: Unable to open an attached file

If the name of the path or attached file contains an ampersand, the file is not available and cannot be opened.

Anomalie #4054 : Event editors

In some cases, you can choose a resource when it is not allowed.

Anomalie #4046 : Dashboard: Modify the views placement

Dragging and dropping widgets to arrange the dashboard were authorized for non-administrator users

Anomalie #4045 : Menu label: UK

A wording is missing in an English language menu

Anomalie #4044 : VPGO: unable to set a description for an end date

In event input editors, it is not possible to fill a description in the end date field.

Anomalie #4043 : Rich text heading

Pressing the "enter" key delete the layout

Anomalie #4042 : Event import / export: now

Importing the value "now" in a form heading under the "HH: mm" format does not work

Anomalie #4037 : SAML2: connection not possible

In some cases, SAML2 authentication does not work

Anomalie #4034 : calculate the form value

In some cases the value is not updated

Anomalie #4033 : XLSX import: taking into account formulas

Text formulas are not taken into account

Anomalie #4030 : VPGO: Unable to change resource

On a duplicated event it's not possible to change resource.

Anomalie #4028 : Item: Used by

In some cases an error occurs when using the "Used by" feature

Anomalie #4026 : Problem import resource & format text of item

In some cases the resource viewer is incorrectly created which generates the exception

Anomalie #4025 : Issue when invoking the "GET /resources" endpoint

In some cases, invoking the "GET /resources" endpoint returns an HTTP 422 error (code 8 - No entities found) when a dimension had no resources

Anomalie #4014 : Excel import: column format determination

In some cases the format of the column is incorrectly determined

Anomalie #4013 : Gantt view: printing

In some cases, the layout when printed is not correct

Anomalie #4004 : Events report : 'Ventilation' label

Use of the french translation 'Ventilation' instead of 'Breakdown'

Anomalie #4001 : Geoloc: scheduling

The ordering of the children in an event editor causes an error

Anomalie #3999 : Issue when invoking the "GET /resource/modify" endpoint (API v1)

In some cases, invoking the "GET /resource/modify" endpoint returns an error code 4 ("Update KO") due to an internal error

Anomalie #3971 : VPGO: Problem while editing text field with keyboard

On VPGO when we edit a text field which is at the bottom of the screen, when the keyboard appears it moves the header and footer too up.

Anomalie #3965 : VPPORTAL: Chaining constraints

In some cases where some constraints are not valid, confirming one overrides the others.

BUILD 200701 7

Anomalie #3997 : Filtering on days

With mariaDB, event filters on some specific days do not provide the right result

Anomalie #3993 : Import/export : hours format

The hours are not taken into account correctly when importing them into a form

Anomalie #3991 : Import / export service

"Monthly" mode does not work

Anomalie #3990 : VPGeoloc: Scheduling of events

An error appears in some cases

Anomalie #3988 : VPGO: sorting issue with the agenda view

Events on the agenda view are not sorted.

Anomalie #3986 : MacOS : display issue

On MacOS, some windows appear behind the main window

Anomalie #3981 : VPPublipost : file name

In some cases the file name is not correct

Anomalie #3980 : VPPORTAL: Event creation and end date issue

The event's creation rule doesn't have the same behaviour (end date) whether if we create an event by dragging and dropping it in the in a weekly schedule view or a monthly view.

Anomalie #3979 : VPPORTAL: Calculation issue of persistent headings

When we change an event's resource, the recompute of persistent headings is not done on the former resource (but only on the new one).

Anomalie #3978 : Printing: Event input editor

The list of child events is not printed

Anomalie #3977 : VPPortal: Edit contexts

Entering default sizes does not work

Anomalie #3976 : VPGO: Missing attributes in events editors

If an event doesn't have an attribute it is not displayed in its editor on VPGO. It creates a problem to set a resource to that event.

Anomalie #3973 : Permissions management - Name of the forms

The name of the forms no longer appears when editing a permission. The heading labels are only visible

Anomalie #3972 : VPGO: Missing attributes in events editors

If an event doesn't have any attribute, it is then not displayed in its editor on VPGO. Therefore, it creates an issue to assign a resource to that event.

Anomalie #3970 : VPGO: Choosing a resource when creating an event

Event creation: If there are more than 1000 entities when having the possibility to select a resource, the search is done on all the resources of the dimension (the hierarchy filter is not used).

Anomalie #3969 : Import in MSEXcel format

In some cases, the format of the cell is not well determined

Anomalie #3968 : VPGeolocation: HereMap display

In some cases, displaying maps under HereMap does not work

Anomalie #3967 : API v2 : Creating event with form headings

When creating an event, the form headings are not taken in account

Anomalie #3966 : "Used by" function

In some cases the result is not correct

Anomalie #3964 : VPGO: Unable to modify a time attribute

In event editors, if the start date, start day and start time attributes are displayed, it is then not possible to change the time.

Anomalie #3962 : VPGO: Loss of position when creating a new event/resource

When creating an event or resource, the creation position is lost in some cases.

Anomalie #3961 : Printing issue on event reports

Printing an event report in "PieChart" mode is not fully performed.

Anomalie #3960 : Event editors

In event editors, the modification of a valuation item does not update the total value

Anomalie #3958 : Schedule view: Duration bar display

In certain cases, the height of the duration bars does not allow to completely display the content of text

Anomalie #3951 : Link creation

Unable to create links via the "link events" function

Anomalie #3949 : Japanese characters not taken into account

Japanese font is not supported in note fields.

Anomalie #3946 : API V2 : Memory saturation on the server

Addition of optimization mechanisms for the memory use

Anomalie #3936 : Duplication of events

In some cases, the duplicated event appears in an agenda view or it should not be displayed

Anomalie #3931 : Taking into account the 'Cross-origin resource sharing'

The 'Cross-origin resource sharing' is taken into account in the API v2

Anomalie #3930 : VPGO: Display of attribute descriptions

We no longer see attribute descriptions in the VPGO editors

BUILD 200612 7

Anomalie #3963 : "Concatenation of text" heading in forms

The output is no longer available.

BUILD 200610 7

Anomalie #3955 : Schedule display: linked events

In some cases, linked events appear twice in the planner.

Anomalie #3954 : Printing resource editors

The printing functionality is not possible when an editor contains a list of event.

Anomalie #3952 : Event editor in Spanish

In event editors, the time does not appear if the selected language is Spanish

Anomalie #3947 : VPGO: List of resources in a resource editor

For some settings a list of resources in a resource editor is never filled.

Anomalie #3945 : VPGO: Event duplication problem

If we duplicate an event and we change dates (start or end date) then a error occur.

Anomalie #3944 : VPGO: Unable to create an event in an agenda view

Unable to create event in calendar view

Anomalie #3938 : Sort schedule line

When the sort item is not visible, the sort is not correct

Anomalie #3937 : Heading: Incomplete label

In some cases, the name of the headings is incomplete

Anomalie #3935 : Import / Export: automatic consideration of time format

Hours in US format are not taken into account

Anomalie #3934 : Active view

In some cases a "floating" view remains active and imposes the menus whatever the view.

BUILD 200603 7

Anomalie #3932 : Launch of VP

Unable to launch VP on a client computer whose locale is not known managed by VP

Anomalie #3928 : Compact events issue

It is impossible to compact events.

Anomalie #3927 : Duplication of multiple events

Simultaneous duplication of multiple events do not work correctly.

Anomalie #3925 : VPPORTAL: Signature heading

If a signature heading is displayed on another tab than the main one, it is then not possible to use it.

Anomalie #3922 : Evenet deletion

In some case, the deletion of the parent event do not delete the chlid events

Anomalie #3918 : VPGO: boolean headings in agenda view

If a boolean heading is displayed in an event description of an agenda view, a HTML code is then displayed instead of a checkbox.

Anomalie #3917 : Summary of events: update issue

Summary of events and calculated date headings are not updated correctly.

Anomalie #3916 : VPGO: IOS Notifications

Notifications do not work on IOS devices.

Anomalie #3914 : VPPORTAL: impossible to change the icon size in an Agenda view

It is not possible to choose the size of an icon in a Agenda view.

Anomalie #3912 : Import/export: creation issue

When an event is created automatically after creating a resource, the event import/export is not triggered.

Anomalie #3911 : Access to private data

Even if the option is enabled, admin users do not have access to private data.

Anomalie #3908 : SQL request issue

In some cases, if the execution of a SQL request is too long, then the application crashes.

Anomalie #3903 : Editor: buttons issue

When the scrolling bar is displayed, some buttons are not enabled.

Anomalie #3896 : Service import

In some cases, the selected value is not taken into account in the editor used for triggering the imports.

BUILD 200511 7

Anomalie #3899 : VPPORTAL: Groundback color on event lists

The groundback color on events list was not displayed.

Anomalie #3897 : Email import

Email import doesn't work.

BUILD 200506 7

Anomalie #3894 : Editor : resource list

The option "Display the edit pane" is displayed even if not enabled

Anomalie #3893 : API V1: call issue

In some cases, the API call is not valid

Anomalie #3889 : VPGO, VPPORTAL: Default value issue

When creating an event (level 2 or more), form headings are not updated with their default values (\$USERNAME,...)

Anomalie #3887 : VPGO: Search on a list of more than 1000 resources

No results are displayed when a search is done on a list of more than 1000 resources

Anomalie #3884 : VPPortal: Modification rights on rich text

It is always possible to modify a rich text heading even if a user doesn't have the right to do it

Anomalie #3882 : VPPortal: Rouding error on non working event duration

In some cases, there is a rouding error on non working event duration (1 or 2 minutes less)

Anomalie #3880 : SQLServer : Restoring a vps file

In some cases, it is not possible to restore a vps file

Anomalie #3877 : VPS: data recovery issue under SQL server

Impossible to restore VPS from SQLserver on a new SQLserver

Anomalie #3875 : VPGO: Add a picture when creating an event

If a picture is added when creating a new event, the event is not saved correctly. The picture is still uploaded on the server.

Anomalie #3874 : VPGO: reading timeout for some queries

When reading events, the connection timeout is used for the entire transaction. This value being taken into account, this leads to untimely disconnections.

Bug correction available in VPGO> = 1.0.14

Anomalie #3865 : Automatic QRCode generation

In some cases, It is not possible to generate the QRCode automatically

Anomalie #3861 : VP7 Admin : User list issue

In some cases, the list of the users is not displayed properly

Anomalie #3858 : VPGO: Issue to launch other mobile app from vpgo

On Android devices, it is impossible to launch other mobile application installed on the smartphone/tablet (from a geolocation heading)

Anomalie #3854 : Mandatory heading

When creating a resource with a mandatory heading, if this heading is not filled, there is no indicator marking this mandatory field in the resource editor.

Anomalie #3849 : VPPORTAL: Dashboard colour issue

When a colour is modified in a dashboard, the background colour is now modified. The text colour is calculated automatically depending on the background colour.

Anomalie #3847 : Web Calendar

There is a gap of 2 hours when interfacing data with Google calendar

Anomalie #3846 : VPGO: heading value

The value of a heading resource which is linked (displayed in an event editor) was replaced by another heading value of the resource.

Anomalie #3845 : Events shift when displaying the print preview of a schedule view

In some cases, a shift occurs when displaying the non working days

BUILD 200402 7

Anomalie #3843 : VPPORTAL: Error in Kanban view

There is an error in the Kanban view if we are not using a sort item.

Anomalie #3842 : Filter: used by

In some cases, the "used by" function of filters causes an internal error

BUILD 200401 7

Anomalie #3839 : Selection filter issue

In some cases, an error message appears when applying a selection filter to a view.

Anomalie #3838 : Valuation items configuration

Impossible to modify some values.

Anomalie #3836 : VPI file import

In some cases, the VPI file import is not fully uploaded.

Anomalie #3828 : Statistics reports in the Admin center

Statistics reports in the Admin center are not displayed anymore.

Anomalie #3827 : Error message when editing events through the default editor

An error message appears when a default event editor is the only one available and if the "always available" option is not activated.

Anomalie #3826 : Google drive: files access issue

The access to any Google drive was not working.

Anomalie #3825 : Text on duration bar issue

In some cases, the text on duration bars is not displayed properly.

Anomalie #3814 : VPGO: Event lists

When no event has been created and assigned to a resource, it is then not possible in VPGO to create and display any new event for that specific resource.

Created events disappear automatically from the list.

It requires to close the event list and re-open it to see the created events.

Anomalie #3810 : Resource printing: details mode issue

It is not possible to print events of a resource when the details mode is selected in Visual Planning

Anomalie #3802 : Resource printing: details mode issue

It is not possible to print events of a resource when the details mode is selected in Visual Planning

Anomalie #3801 : VPGO: Issue to upload a picture in an attachment field (Image gallery mode)

In VPGO, it is not possible to upload an image in an attachment field using the 'Image Gallery' mode.

Anomalie #3799 : VPGO: issue to display pictures on IOS

On IOS, icons and pictures are not displayed due to some IOS limitations.

Anomalie #3791 : Issue to create new events

In some cases, it is not possible to create new events

Anomalie #3789 : VPPortal: Issue when modifying an event duration

When the duration of an event is modified in an event editor, the end date is instantly recalculated. This can cause problems if the value is long. There is a time delay which allows the user to modify the duration and, only once he has finished, to recalculate the end date automatically.

BUILD 200304 7

Anomalie #3786 : Some events don't move when shifting multiple events

Some events don't move when shifting multiple events

Anomalie #3779 : Single choice list: conditions of association

The association items list is not always correct.

Anomalie #3774 : Import-export: son events update from the father one

In some cases, it is not possible to identify the father event thanks to its UID

Anomalie #3769 : Calendar set up issue: access and configuration are not allowed

It is not possible to configure the hourly models as well as hourly and daily calendars.

BUILD 200214 7

Anomalie #3762 : Visual Planning launching from local installation

When launching Visual Planning from a local installation which is not the default one, the start screen was not available. It was then impossible to launch and use Visual Planning.

Anomalie #3751 : Calendar: Configuration of the specific days section

When creating a daily calendar, it is not possible to select any period type to define specific days.
