

BUILD 230301 7

Anomalie #5206 : VPGO: Safety update for Android

BUILD 221128 7

Anomalie #5116 : Authentication safety flaw

BUILD 220907 7

Anomalie #5015 : the functionality used in filters in v7

the "Used in" option on the event filter displays the message does not display enough results.

BUILD 220802 7

Anomalie #4984 : Edition multiple d'événements

In some cases, the end date is not reclassified during the multiple edition

BUILD 220706 7

Anomalie #4962 : VPPORTAL license

In some cases, a user does not direct the license.

BUILD 220601 7

Anomalie #4936 : Multiple resource edition

In certain cases, the multiple edition of resources causes 0 of the durations of certain events to 0

Anomalie #4922 : Event value and multiple edition

Event values don't update when using multiple edition

BUILD 220504 7

Anomalie #4890 : Child event modification

The changes done on a child event are not saved

Anomalie #4876 : + button and languages

The + button doesn't appear in DE but is here in FR

Anomalie #4874 : API V1 (REST/SOAP): Resource creation / Default event creation rule not taken into account

The default event creation rule is not taken into account when creating a resource (as well as hourly and daily calendars)

BUILD 220406 7

Anomalie #4871 : Father Event Edition

In some cases the creation of a son event gets the function of the father's validation

Anomalie #4868 : event bar label and multi row

When calculating the necessary space, line break are included
When displaying, line break are not included
There was a gap

Anomalie #4854 : VPGO: character % encoded

In attachment URLs the % character is encoded a second time.

Anomalie #4847 : Forgot your password

In some cases it does not function

Anomalie #4833 : API V2 : Les noms d'attributs sont passés à une autre langue

In some cases, the server's (Local) language is reset to another language

Anomalie #4831 : VPGO: Halfday heading

The halfday heading is wrongly displayed and causes a crash.

Anomalie #4819 : VPPORTAL: Line break in event bar

The line break character isn't replaced when displaying a multiline heading in an event's bar (agenda and scheduler view).

BUILD 220302 7

Anomalie #4825 : VPGO: Numerical input and keyboard

The displayed keyboard for numerical input don't allow to enter comma in some languages.

Anomalie #4818 : Mail import: incorrect attachment

In some cases, importing email attachments causes an error

Anomalie #4816 : VP Portal - Description does not appear

in some browsers the description does not appear

Anomalie #4816 : VP Portal - Description does not appear

in some browsers the description does not appear

Anomalie #4794 : Event displacement

Moving according to the number of days of the hourly events causes the hours of the events to be lost

BUILD 220202 7

Anomalie #4789 : Event report: filter to request

les valeurs saisies du filtre à demander ne sont pas pris en compte

Anomalie #4786 : VPGO: Upload attachment on server VP7

In VPGOU for server VP7 it isn't possible to upload attachment.

Anomalie #4779 : Resource Assignment

in some cases the list of resources in an event editor does not take the correct values

Anomalie #4774 : VPPortal: change of start/end date

In some cases, editing an event automatically changes the start and end date

BUILD 220124 7

Anomalie #4759 : Filter to ask

In certain cases, certain "to ask" criteria are not taken into account

BUILD 220107 7

Anomalie #4757 : End of life of the JAVA certificate

BUILD 220105 7

Anomalie #4740 : Resource editor: resource heading

the selection filter is not correct

Anomalie #4739 : VPPortal: external html

the css of externe pages are not taken into account

Anomalie #4739 : VPPortal: external html

the css of externe pages are not taken into account

Anomalie #4738 : Date display format

An "event value" heading that points to a "date and time" heading changes the format of this heading to its own

Anomalie #4728 : Report Table Header

The height of the Header varies with the text length

Anomalie #4723 : Editor: "to ask" filter

In certain cases, the filters "to ask" are not taken into account in the editors

BUILD 211215 7

Anomalie #4734 : Log4J security vulnerability

A ZeroDay security vulnerability has been detected on the Log4J library

BUILD 211201 7

Anomalie #4697 : Link unique choice list

Linking unique choice list doesn't work on VPGO

Anomalie #4694 : VPGO Notifications

In some cases the notification does not reach the affected user when they change the phone,

Anomalie #4643 : Single choice heading

In some cases, the modification loses values

Anomalie #4641 : Display of colors in editors

In certain cases, the color of the calculated items is not respected

Anomalie #4635 : VPPORTAL: Crash when editing a resource, an event

Crash when editing a resource, an event, with a set editor which doesn't exist anymore.

Anomalie #4634 : Filter: creation of public filter

Despite the ban on creating public filters, this is possible via search

Anomalie #4610 : upload a photo from VPGO 7

In some cases uploading a photo from VPGO does not work correctly

Anomalie #4610 : upload a photo from VPGO 7

In some cases uploading a photo from VPGO does not work correctly

BUILD 211103 7

Anomalie #4632 : VPGO: Crash when editing an event

VPGO crash when editing an event with a geolocalization heading.

Anomalie #4614 : Duplication of events

In some cases the duplication does not work

BUILD 211006 7

Anomalie #4590 : Event creation

In a monthly diary, when creating an event, the type of event does not respect the creation rule

Anomalie #4585 : VPGO: Slow process in some case

In the agenda view if there is no events the rights checks take more times.

Anomalie #4580 : When a password expires, user cannot reset password via the password reset form

Visual Planning will keep saying password incorrect.

Anomalie #4579 : Event and constraints update

Constraint A
Constraint B

Assuming Event E verifying A and B
We modify E so it verify B but not A anymore, when appli, the changes are updated.
We modify E again so it now verify A but not B anymore, when appli, the changes aren't updated

Anomalie #4578 : Event resource print configuration

Event resource print configuration is not saved

Anomalie #4577 : counter type item

If the "repeat form" option is unchecked, the event is created but the counter item is empty.

Anomalie #4576 : valuation station

Access to valuation station does not work properly when exceeding 25 elements

Anomalie #4575 : concatenation of multiline heading type

make the concatenation of multiline heading type impossible

Anomalie #4571 : VPGO: Multiple notifications

When we log in with multiple users on the same planning on the same phone then we receive the notifications for all those users.

Anomalie #4557 : VPPortal: size of icons in the diary

the size of the icons is not respected

BUILD 210901 7

Anomalie #4565 : saving form data

In some cases the form data is not saved correctly

Anomalie #4563 : Resource assignment via event Dnd

In some cases, the event view does not update after a resource assignment.

Anomalie #4560 : ignoring parameter "parentUID"

The parentUID parameter is ignored

Anomalie #4554 : Multiple modification

You can change a ressource on events with right clic affect but it's not working with the editor

BUILD 210804 7

Anomalie #4551 : API V2 - Request error

HTTP 500 error when creating a resource when detailed history is enabled

Anomalie #4547 : Computed date heading

In some cases, computed date values are not kept

Anomalie #4546 : Planner settings importation

In some cases, importing planner settings causes an error

Anomalie #4544 : VPPortal: password forgotten

Unable to enter new password

Anomalie #4543 : Planning printing

In some cases the printing period is not taken into account

Anomalie #4542 : Geolocation: Display of GoogleMap maps

The display of Google Maps does not work.

Anomalie #4540 : REST API: user creation issue

Data backup error when creating a user

Anomalie #4539 : Resource export

With SQLServer and in certain cases, the export causes an error in the database

Anomalie #4538 : Export event reports: format dates in xls

the date format does not depend on the region

Anomalie #4536 : Selection filter issue

In some cases, applying a selection filter does not work

Anomalie #4533 : Xlsx import format

the calculation of the formulas is not taken into account

Anomalie #4529 : VPPORTAL: Resource duplication

When duplicating a resource, if the editor contains a unique choice list so it's the ID of the selected value that is set as a value of this list.

Anomalie #4527 : VPPOTAL: Display options button

When displaying agenda view on a small screen the option button is hidden.

Anomalie #4516 : VPGO: Event summary with HTML tags

In some headings on iOS it's possible to see HTML tags.

BUILD 210707 7

Anomalie #4525 : VPPORTAL: Multichoice input

Selection in multichoice input is not saved.

Anomalie #4523 : Photo display in first column of tree view

the display of an image in the first column of the tree view is not taken into account.

Anomalie #4521 : VPGO: Duplication event problem

The duplication of an event with children triggering a constraint is problematic.
An additional event is created and it is not possible to select the children.

Anomalie #4520 : VPGO: Duplication event problem

The duplication of an event with children triggering a constraint is problematic.
An additional event is created and it is not possible to select the children.

Anomalie #4510 : VPGO: resource change

In offline mode, the change of resource does not appear in the list after modification

Anomalie #4509 : Unregistered resource changes

Resource modifications are not taken into account when there is a resource view with editing pane of the said resource

Anomalie #4508 : Planing view: date change

In some cases, the date change does not work

Anomalie #4504 : Form summary heading

In some cases the value is not recalculated when adding children

Anomalie #4501 : Synchronizing views

In some cases, date synchronization does not work when changing display favorites

Anomalie #4498 : Forgot your password

In some cases it does not work

BUILD 210602 7

Anomalie #4495 : VPPORTAL: Unable to validate profil dialog

In some cases, at login the profil dialog pops up, but it's not possible dans validate it.

Anomalie #4494 : adminVP: saving permissions

Cannot create permissions while being "administrator" of a planning

Anomalie #4493 : MSWord Mail Merge: Inoperative Timestamp

Si on publie plusieurs événements le nom de fichier est identique

Anomalie #4492 : VPGO: Creation date in agenda view

In a view agenda the selected date is not used for the event creation.

Anomalie #4491 : VPPortal - History does not show on input editor

we deleted the history field in the custom editor, this feature is not implemented

Anomalie #4491 : VPPortal - History does not show on input editor

we deleted the history field in the custom editor, this feature is not implemented

Anomalie #4488 : Gantt view: Event modification

In some cases after event modification, the vertical scroller is not positioned correctly

Anomalie #4487 : Blueprint zones loading

Problem displaying zones when loading blueprints saved in the choices combo box

Anomalie #4483 : Form summary heading

In some cases, saving a resource used in a summary heading takes a long time

Anomalie #4480 : VPGO: Empty display on child event

In a child event list it is possible that some display attributes are empty (empty string).

Anomalie #4478 : Printing from VPPortal

List printing problem in VPPortal

Anomalie #4472 : VPPORTAL: Unable to load on iOS

Unable to load the login page on iOS.

Anomalie #4471 : Importing VPI file

The consideration of configuration resources is not always effective

Anomalie #4469 : Resource assignment: having events

the event filter (all) is not saved

Anomalie #4465 : CreateEventResource: wrong resourceModel

When we create an eventResource and click on Apply, the resourceModel is no longer the right one, which re opens the wrong editor

Anomalie #4428 : VPGO: Event duplication with children

On VPGO, duplicate an event doesn't duplicate the children

Anomalie #4428 : VPGO: Event duplication with children

On VPGO, duplicate an event doesn't duplicate the children

BUILD 210505 7

Anomalie #4461 : Admin center: cannot save permissions

A planning administrator cannot modify permissions.

Anomalie #4458 : Resource assignment

changing the filter does not change the result

Anomalie #4452 : Gantt view: planning positioning

After applying a filter, the planning position is not correct

Anomalie #4450 : Automatic event creation

Automatic event creation does not trigger imports / exports

Anomalie #4448 : Creation rule edition

Cannot change the duration according to calendar

Anomalie #4446 : Import / export: memory problem

In some cases, the resources import requires too much memory

Anomalie #4443 : VPPortal: attachment heading

In some cases the addition of file is not done.

Anomalie #4442 : adminVP: saving permissions

permissions are not saved with an "admin planning" profile

Anomalie #4440 : VPPORTAL: Linked events are not displayed

Linked events are not displayed in the planning view.

Anomalie #4431 : View saving and plan

When you select a plan on a plan resource and save the view, the plan is not saved

Anomalie #4429 : Event view values

In tree mode when a group is opened, parents bools values are always equal to false

Anomalie #4426 : VPGO: HistoryAttribute sorting

HistoryAttribute are serialized as String and not DateTime

Anomalie #4417 : Printing problem

When printing, some values are not displayed when "always display icon" option is activated

Anomalie #4416 : VPGO: Choice of the default resource

the selected resource is not the first in alphabetical order

Anomalie #4415 : VPPortal: Choice of the default resource

the selected resource is not the first in alphabetical order

Anomalie #4408 : VPPortal : events position

When we change the date on a planning context where a group of resources is grouped together, the events are not well positioned

Anomalie #4406 : Printing Resource Editors

In some cases printing is incomplete

BUILD 210414 7

Anomalie #4424 : AdminVP: slow display

In the case of the presence of many users, the display is slowed down

Anomalie #4420 : API: error in resource assignment

In some cases the allocation of a resource causes an error

BUILD 210407 7

Anomalie #4412 : No scrolling bar when zommed in

When the page is zoomed in, there is no scroll bar

Anomalie #4410 : Gantt view: width of item not saved

The width of the headings is not saved

Anomalie #4407 : VPGO: Summary of events heading

In VPGO the field summary of events is not displayed as multiline.

Anomalie #4401 : Event import

In some cases, the key is not taken into account

Anomalie #4400 : VPGO: Signature heading

While editing a signature heading if we modify the orientation of the device then the "pen's" position is offsetted.

Anomalie #4399 : Saving schedules by URL

In some cases, the backup url does not work: error 501

Anomalie #4398 : Gantt view: Display in the table

When the nodes are closed some values are not displayed

Anomalie #4396 : Planning view: order of events

In some cases, the order of the events is not respected

Anomalie #4395 : Planning view: order of events

In some cases, the order of the events is not respected

Anomalie #4392 : VPGO: display in the agenda

In some cases, display labels are incomplete

Anomalie #4388 : Load plan: slow calculation

In certain cases, the calculation filter of a load plan causes delays

Anomalie #4387 : VPPortal Kaban : duplicating event when changing state (drag n drop)

the modification and the save are now done on the original event instead of a duplicate of the event

Anomalie #4385 : Planning view: display of events

The order of events is not respected in some cases

Anomalie #4384 : Print load plan

In some cases, the load plan is not completely printed

Anomalie #4382 : VPGO/VPPortal: counter type heading not initialized when creating an event

When creating an event, the counter type headings of a form are not initialized

Anomalie #4381 : Resource view: editing pane

It is possible to validate in the editing pane while no resource is selected

Anomalie #4378 : VPGO: Event offline creation

When creating an event offline and modifying it then when synchronising it, it's the actual date that is used for the begin date.

Anomalie #4377 : API: Event update: identification of a resource by its identification headings

The identification of a resource does not work when one of the resource identification headings is a resource type heading

Anomalie #4372 : Dashboard: Event report with incorrect legend

The legend of an event report is wrong, the colors do not match the data.

Anomalie #4367 : VPGO: Rendering problem on iOS

On iOS, multilines text field in HTML aren't well displayed, text fields with a quote are also badly displayed.

Anomalie #4356 : VPGO : Selection of resources required for event creation

The selection of resources required for event creation is not kept, they are replaced by those defined in the creation rule.

Anomalie #4354 : VPPortal : Selection of resources required for event creation

The selection of resources required for event creation is not kept, they are replaced by those defined in the creation rule.

Anomalie #4350 : Numerical value import in XLS

Casting problem when reading an xls numerical value
Removed cast to Double

Anomalie #4313 : VPGO Format of dates and times in English

The date and time format remains in English even if the phone is in another language

BUILD 210303 7

Anomalie #4365 : Export of load plans

the export in xls format does not work

Anomalie #4362 : Sorting resources in a view

In some cases, the order is not respected

Anomalie #4360 : Resetting the value of a counter type heading

The value of a counter type heading is reset when modifying an event

Anomalie #4359 : Resource view: editing pane

In some cases, the validation is not taken into account

Anomalie #4358 : Events report: END-Period calculation type

In certain cases, the calculation is not taken into account

Anomalie #4357 : Planing view: moving event

In some cases the event displacement does not take into account the calendar

Anomalie #4355 : Resetting the value of a counter type heading

The value of a counter type heading is reset when modifying an event

Anomalie #4352 : Event view: column width

If the view is zoomed, the width of the columns is not correctly saved in the display context

Anomalie #4351 : Event report: incorrect display

If no calculation is visible, the result is incorrect

Anomalie #4349 : VPPORTAL: Resource editor with linked resources

In a resource editor with linked resources when we modify some resource headings then others are not always updated.

Anomalie #4345 : VPGO crash issue in some editors

In some cases, editors do not charge

Anomalie #4342 : Hierarchie Filter/Parent UID

Invoking API2 REST /events/filter acces point on a hierarchy of level 2 and above always returns an empty Parent-UID

Anomalie #4341 : VPBlueprint: add plan

It is not possible to add new plans

Anomalie #4340 : Multiple event editing

Error when a signature type item is present

Anomalie #4339 : View: full screen

In some cases, double clicking on the header of a view does not put it in full screen mode

Anomalie #4338 : Gantt view: load plan

load plans disappear after applying a filter

Anomalie #4336 : Multiple event selection

In some cases, the event selection via "Shift" is incorrect

Anomalie #4334 : VPGO: Unable to add an attachment

It is not possible to add an attachment, while online, to an event in creation.

Anomalie #4325 : Adding event

in some cases the list of possible hierarchies is incorrect

BUILD 210203 7

Anomalie #4323 : Opening schedule

In some cases, unable to open the schedule

Anomalie #4322 : API: date format issue

In some cases, the date format linked to the server is not recognized

Anomalie #4319 : Dashboard: event report

the display of event reports is not correct

Anomalie #4318 : Unable to download file using API v2

Invoking the "POST /files/download" API endpoint returns the error "HTTP Status 500 – Internal Server Error" due to an internal error

Anomalie #4317 : VPGo7 notification

When you touch the notification on the phone, the server stops responding.

Anomalie #4316 : Event editing

the edition of the end date directly in a table does not work correctly if the event is linked

Anomalie #4314 : VPPORTAL: Event duration problem

In some cases the event duration, displayed in an editor, is one hour more.

Anomalie #4312 : VPPORTAL: Disconnected when creating a child event

Creating a child event crash the app and disconnect the user.
Added necessary functions for child event processing and creation

Anomalie #4311 : Filter to ask

In certain cases, all the resources are not available in a filter criterion

Anomalie #4307 : VPPORTAL: Disconnected when creating a child event

Creating a child event crash the app and disconnect the user.
Added necessary functions for child event processing and creatio

Anomalie #4304 : VPPortal: Edition of the duration in hours

In some cases the duration in hours turns into minutes

Anomalie #4301 : Issue Deleting Image Gallery Attachments in VPPortal

Delete button in the gallery does not appear

Anomalie #4300 : Sorting resources

the "-" sign is incorrectly sorted.

Anomalie #4295 : Resource editor: resource section

In some cases, the resource selector for a resource type item does not appear in the editor

Anomalie #4294 : Comments: multiple edition

In multiple editing, the behavior of comments is incorrect

Anomalie #4293 : Duplication of resources

In some cases some events are not duplicated when duplicating a resource

Anomalie #4292 : WorkLoad plan: offset from the schedule

In some cases the values of the workload plan are offset from the schedule

Anomalie #4288 : VPPORTAL: Change resource

Select a resource in an editor unable the other resources's field.

Anomalie #4286 : VPPORTAL: Problem duration input

The event duration (format HH:mm) is sometimes taken in minutes.

Anomalie #4285 : WorkLoad plan: incorrect calculation

In some cases, the calculation of the load plan is not correct

Anomalie #4284 : Icon change on several resources

Changing icons on several resources at the same time is not possible when it is an icon that does not belong to the library

Anomalie #4281 : Print event list

the width of the list does not respect the width of the page

Anomalie #4280 : Planning: Manual modification of column width

manual modification is not taken into account

Anomalie #4279 : Delete import / export trigger

Cannot delete a trigger

Anomalie #4278 : Adding event in event list view

In some cases, the action does not appear in the menu

Anomalie #4276 : Form summary heading

In some cases, their use causes slowdowns during modifications

Anomalie #4275 : Creation of a child event via drag & drop

When creating an event via drag & drop in an event list view the start date is not correct.

Anomalie #4274 : Serpentine print

In some cases, the printing is not correct

Anomalie #4267 : VPGO: External routing app

Clicking on the navigation button (from a geolocation heading) doesn't show the system's navigation app.

Anomalie #4248 : VPPortal: attachment removal

In "Album" mode, deleting files is not accessible in the editors

Anomalie #4024 : List of events in html

the name of the files appears in long version

BUILD 210106 7

Anomalie #4272 : Filter on comment

The criterion on the date of the last comment is not taken into account for resources

Anomalie #4269 : Text input field

In some cases the cursor is not positioned well when typing.

Anomalie #4268 : VPPORTAL: Select a resource

We must select 2 times a resource (in the selector for more than 1000 resources) for the choice to be taken into account.

Anomalie #4266 : Duplication of events

The change in duration is not taken into account on child events

Anomalie #4265 : VPPORTAL: Planning view refresh

When we change an event, the resource panel is not updated according to the new computed values.

Anomalie #4264 : MailMerge: resource selection

The selection of a resource is very slow if there is a lot of mailmerge template

Anomalie #4262 : VPGO: Event creation in offline mode

When creating an event in offline mode, its begin and end dates are not update with the according date.

Anomalie #4261 : Resource filter

Some criteria are not taken into account

Anomalie #4260 : API v2 : Creating event with 'counter' type form headings

When creating an event, the 'counter' type form headings are not calculated.

Anomalie #4256 : VPortal: information messages

les message d'informations (rubrique obligatoire, droit non respecté) sont toujours en anglais.

Anomalie #4253 : VPPortal: event creation

In some cases, the creation of an event causes a disconnection

Anomalie #4252 : API v2 : Issue when taking into account the date display format

In some cases, the date display format of resource or form headings are no longer taken into account

Anomalie #4250 : VPPORTAL: Unable to create an event

In a drag and drop it is not possible to create an event, a warning is displayed saying that there is no resources.

Anomalie #4249 : VPGO: Resources heading

The date resource headings are always displayed as Date Hour.

Anomalie #4245 : Events report: Period calculation type

In certain cases, the calculation is not taken into account

Anomalie #4238 : VPPortal: licensing problem

In some cases, unable to connect

Anomalie #4236 : Geolocation: Internationalization of distances

When displaying a trip, the labels are not translated for languages other than French

Anomalie #4234 : Send mail

In some cases, sending email does not work

Anomalie #4233 : VPGO: Form headings

The form headings are not displayed in event editors.

Anomalie #4228 : VPGO: Input text

On iOS it is sometimes difficult to write text on some input. The keyboard doesn't show.

Anomalie #4221 : VPPORTAL: Dynamique filters

While creating or editing an event the dynamic filters of the hierarchy are applied on the displayed resources. If we change a resource or a date then the other resources's lists are updated accordingly to the hierarchy's filter.

Anomalie #4216 : VPPORTAL: Input load and duration

In the event's editor the load input is acting like the duration when we change event's dates. Moreover, the load input displays percentages from 0 to 1 instead of 0 to 100.

BUILD 201210 7

Anomalie #4246 : Planning the view: viewing events

In some cases, the events are not displayed on the schedule

Anomalie #4237 : Resource view: Html display

In some cases, displaying icons causes a display problem

BUILD 201204 7

Anomalie #4235 : VPPortal: event creation

In some cases impossible to create events in VPPortal

BUILD 201202 7

Anomalie #4232 : VPWhatsUp

the display from the list of connected users of a discussion closes the VP window

Anomalie #4225 : Scrollbar

At the bottom of a view, the appearance of the scroll bar partially hides the information

Anomalie #4223 : VPGO: Unable to see some headings

In some cases it's not possible to see resource's headings in an event editor.

Anomalie #4218 : Editing dates in a table

In some cases the editing of the end dates is not correct

Anomalie #4212 : Multiple password update

It is possible to update the passwords of several resources at the same time

Anomalie #4211 : Export: taking into account a period of time

After modifying a period of time, it is not taken into account in the export of events

Anomalie #4210 : Right to view favorite displays

the negation operator (is not, does not end, ...) does not work

Anomalie #4204 : Event view: context menu

In some cases the context menu is not correct

Anomalie #4201 : Calendar positioning

In the case of a dual screen, the positioning calendar of a planning does not appear on the correct screen

Anomalie #4195 : API V2 : Permission Issue when invoking the "PUT /resources" endpoint

In some cases, permissions are not taken in account when invoking the "PUT /resources" endpoint

Anomalie #4193 : Returning form LINK not working properly

Returning from a web page to VPGO closes the application

Anomalie #4191 : VPGO: Unable to see some headings

In some cases it's not possible to see some resource headings in an editor.

Anomalie #4187 : VPPORTAL: Display pattern of date heading

The display pattern of date heading is not well applied in some cases.

Anomalie #4000 : VPPORTAL: Error at login

In some cases on Firefox there is an error at login when the user choosed to automatically fill the inputs login/password by the browser.

BUILD 201104 7

Anomalie #4188 : Summary heading

The newline is not taken into account in the Html representations

Anomalie #4186 : Push notification blocking on VPGO

when we click on a chat notification on vpgo the application crashes

Anomalie #4186 : Push notification blocking on VPGO

when we click on a chat notification on vpgo the application crashes

Anomalie #4184 : VPPORTAL: Publipostage not triggered

After an event creation/modification the publipostage is not triggered.

Anomalie #4182 : API v2 endpoint 'GET /events/{uid}/form' returns attachments headings of all formulars

Invoking the API v2 endpoint 'GET /events/{uid}/form' returns attachments headings of all forms even when they are not attached to the event

Anomalie #4181 : VPGO: Attachment album

When displaying an album image heading it's not possible to click on pictures to download them.

Anomalie #4179 : Saving Gantt views

Saving the column width of a gantt view does not work

Anomalie #4178 : VPGO: Event marking

The event marking isn't done after sending VPGO notification.

Anomalie #4173 : print button in VPPortal does not appear

the print button in VPPortal does not appear in the absence of a context description

Anomalie #4170 : Workload plan: daily load

In some cases, with half-daily events, the calculation is not correct

Anomalie #4168 : Editing event values

Entering multiple editable event values from the same form does not work

Anomalie #4165 : Editing events

When generating a pdf via a child event in the parent's editor, the attachment field is not updated

Anomalie #4163 : constraint no longer works with october build

In some cases the constraints no longer activate

Anomalie #4159 : Export Evt -> access to valuation station

Access to valuation station does not work properly when exceeding 25 elements

Anomalie #4152 : resource color patterns

In certain cases, the change of the color patterns in resource workins as expected during the validation ,but when the resource reopens: they are reset without reason.

Anomalie #4144 : VPPORTAL: Planning view reset to the left

After creating/modifying an event, the horizontal scrollbar reset to the left.

Anomalie #4142 : Resource view

If the background of a resource is dark, the text is black

Anomalie #4118 : VPGO: Loss of input datas before validation

Modified datas (editing an event or a resource) are lost when changing pages (eg: editing a rich HTML text).

Anomalie #4098 : VPPortal - Percentage with decimal is formatted incorrectly

formatting numbers in percent add a backslash

Anomalie #4098 : VPPortal - Percentage with decimal is formatted incorrectly

formatting numbers in percent add a backslash

Anomalie #4080 : VPGO: Crash when validating an event

If a form heading is not valid (when saving an event) then a crash occurs on the server, an error is also displayed on VPGO.

BUILD 201014 7

Anomalie #4147 : VPGO: Attachment trouble

When adding an attachment to an event/resource the attachment heading is not updated.

BUILD 201007 7

Anomalie #4140 : VPPORTAL: Resource selector

The resource selector used when more than 1000 resources gives a wrong default value when no resource are selected.

Anomalie #4139 : VPPORTAL: Map not centered

The map is not centered once the dialog box is displayed.

Anomalie #4137 : VPPORTAL: Events rights

In some cases events rights are badly applied.

Anomalie #4136 : TECH Q: typing extra info in a mail from a mail template - cursor not on place where you are typing

HTML input editing cursor does not work correctly when typing quickly

Anomalie #4135 : VPPORTAL: Compute headings and event suppression

When we delete an event the dimension's compute headings are not computed.

Anomalie #4134 : Import / export: database

In some cases, choosing a table blocks the interface

Anomalie #4133 : VPPortal: Event editor

In some cases, editing an event causes a disconnection

Anomalie #4132 : VPPortal: event creation

Event creation is not done

Anomalie #4128 : VP7 installtion

You must restart the VP server after activation.

Anomalie #4125 : VPPORTAL: Custom label in editors/tooltips

The long title is used when the user set the short title in a custom label.

Anomalie #4123 : Link events

The creation of the link does not respect the calendar for the events worked

Anomalie #4116 : Event editor

After adding a child event, we lose the modifications in the event editor

Anomalie #4110 : Importing excel file

In some cases, using a formula causes an error

Anomalie #4092 : RSS feed: unrecognized attributes

Some attributes are not recognized in the RSS feed

Anomalie #4082 : VPGO: Spinning wheel not displaying on iOS

When we do an action the spinning wheel is not displaying on iOS.

BUILD 200902 7

Anomalie #4091 : Schedule printing: label issue

In some cases, duration bar labels are not printed

Anomalie #4088 : Description of planning not saved

when you create a schedule or import it, the description does not save, the anomaly is corrected

Anomalie #4087 : Favorite display issue

The layout is not maintained

Anomalie #4081 : Agenda view: add event

The event type does not comply with the creation rule

Anomalie #4081 : Agenda view: add event

The event type does not comply with the creation rule

Anomalie #4078 : Event-Import from Database can not be created in build 200805

The database type triggers a "listener" that modifies the value of the current configuration. Therefore, the application crashes

Anomalie #4076 : ICAL: no event in the stream

In some cases, events are not imported in the Ical stream

Anomalie #4075 : Favorite displays

In some cases the favorite display loses the original layout

Anomalie #4074 : Event editor: display issue

In some cases, the cancel and validate buttons are not displayed

Anomalie #4070 : VPDesk: SAML2 incompatibility

SAML2 authentication is not taken into account via VPDesk

Anomalie #4068 : Mouse scrolling issue

Pressing the ctrl key + scrolling doesn't allow to scroll in specific views

Anomalie #4067 : API V2 - Event search execution time in SQLServer

The execution time of an event search request is unusually long

Anomalie #4066 : Duplicate a unique identification heading in a form

The duplication of an event does not modify the unique identification number contained in a form

Anomalie #4060 : Summary of events with rich text in form headings

Headings with rich text are not properly taken into account in "Summary of Events" heading.

Anomalie #4059 : VPGO: Unable to read special character

In some QRcodes there is a special character that makes the JSON parser crash.

BUILD 200805 7

Anomalie #4058 : Form : single choice heading

In some cases, the empty value is lost

Anomalie #4056 : Issue when exporting heading from a parent event

In some cases, exporting headings from parent events does not work

Anomalie #4055 : VPGO: Unable to open an attached file

If the name of the path or attached file contains an ampersand, the file is not available and cannot be opened.

Anomalie #4054 : Event editors

In some cases, you can choose a resource when it is not allowed.

Anomalie #4046 : Dashboard: Modify the views placement

Dragging and dropping widgets to arrange the dashboard were authorized for non-administrator users

Anomalie #4045 : Menu label: UK

A wording is missing in an English language menu

Anomalie #4044 : VPGO: unable to set a description for an end date

In event input editors, it is not possible to fill a description in the end date field.

Anomalie #4043 : Rich text heading

Pressing the "enter" key delete the layout

Anomalie #4042 : Event import / export: now

Importing the value "now" in a form heading under the "HH: mm" format does not work

Anomalie #4037 : SAML2: connection not possible

In some cases, SAML2 authentication does not work

Anomalie #4034 : calculate the form value

In some cases the value is not updated

Anomalie #4033 : XLSX import: taking into account formulas

Text formulas are not taken into account

Anomalie #4030 : VPGO: Unable to change resource

On a duplicated event it's not possible to change resource.

Anomalie #4028 : Item: Used by

In some cases an error occurs when using the "Used by" feature

Anomalie #4026 : Problem import resource & format text of item

In some cases the resource viewer is incorrectly created which generates the exception

Anomalie #4025 : Issue when invoking the "GET /resources" endpoint

In some cases, invoking the "GET /resources" endpoint returns an HTTP 422 error (code 8 - No entities found) when a dimension had no resources

Anomalie #4014 : Excel import: column format determination

In some cases the format of the column is incorrectly determined

Anomalie #4013 : Gantt view: printing

In some cases, the layout when printed is not correct

Anomalie #4004 : Events report : 'Ventilation' label

Use of the french translation 'Ventilation' instead of 'Breakdown'

Anomalie #4001 : Geoloc: scheduling

The ordering of the children in an event editor causes an error

Anomalie #3999 : Issue when invoking the "GET /resource/modify" endpoint (API v1)

In some cases, invoking the "GET /resource/modify" endpoint returns an error code 4 ("Update KO") due to an internal error

Anomalie #3971 : VPGO: Problem while editing text field with keyboard

On VPGO when we edit a text field which is at the bottom of the screen, when the keyboard appears it moves the header and footer too up.

Anomalie #3965 : VPPORTAL: Chaining constraints

In some cases where some constraints are not valid, confirming one overrides the others.

BUILD 200701 7

Anomalie #3997 : Filtering on days

With mariaDB, event filters on some specific days do not provide the right result

Anomalie #3993 : Import/export : hours format

The hours are not taken into account correctly when importing them into a form

Anomalie #3991 : Import / export service

"Monthly" mode does not work

Anomalie #3990 : VPGeoloc: Scheduling of events

An error appears in some cases

Anomalie #3988 : VPGO: sorting issue with the agenda view

Events on the agenda view are not sorted.

Anomalie #3986 : MacOS : display issue

On MacOS, some windows appear behind the main window

Anomalie #3981 : VPPublipost : file name

In some cases the file name is not correct

Anomalie #3980 : VPPORTAL: Event creation and end date issue

The event's creation rule doesn't have the same behaviour (end date) whether if we create an event by dragging and dropping it in the in a weekly schedule view or a monthly view.

Anomalie #3979 : VPPORTAL: Calculation issue of persistent headings

When we change an event's resource, the recompute of persistent headings is not done on the former resource (but only on the new one).

Anomalie #3978 : Printing: Event input editor

The list of child events is not printed

Anomalie #3977 : VPPortal: Edit contexts

Entering default sizes does not work

Anomalie #3976 : VPGO: Missing attributes in events editors

If an event doesn't have an attribute it is not displayed in its editor on VPGO. It creates a problem to set a resource to that event.

Anomalie #3973 : Permissions management - Name of the forms

The name of the forms no longer appears when editing a permission. The heading labels are only visible

Anomalie #3972 : VPGO: Missing attributes in events editors

If an event doesn't have any attribute, it is then not displayed in its editor on VPGO. Therefore, it creates an issue to assign a resource to that event.

Anomalie #3970 : VPGO: Choosing a resource when creating an event

Event creation: If there are more than 1000 entities when having the possibility to select a resource, the search is done on all the resources of the dimension (the hierarchy filter is not used).

Anomalie #3969 : Import in MSEXcel format

In some cases, the format of the cell is not well determined

Anomalie #3968 : VPGeolocation: HereMap display

In some cases, displaying maps under HereMap does not work

Anomalie #3967 : API v2 : Creating event with form headings

When creating an event, the form headings are not taken in account

Anomalie #3966 : "Used by" function

In some cases the result is not correct

Anomalie #3964 : VPGO: Unable to modify a time attribute

In event editors, if the start date, start day and start time attributes are displayed, it is then not possible to change the time.

Anomalie #3962 : VPGO: Loss of position when creating a new event/resource

When creating an event or resource, the creation position is lost in some cases.

Anomalie #3961 : Printing issue on event reports

Printing an event report in "PieChart" mode is not fully performed.

Anomalie #3960 : Event editors

In event editors, the modification of a valuation item does not update the total value

Anomalie #3958 : Schedule view: Duration bar display

In certain cases, the height of the duration bars does not allow to completely display the content of text

Anomalie #3951 : Link creation

Unable to create links via the "link events" function

Anomalie #3949 : Japanese characters not taken into account

Japanese font is not supported in note fields.

Anomalie #3946 : API V2 : Memory saturation on the server

Addition of optimization mechanisms for the memory use

Anomalie #3936 : Duplication of events

In some cases, the duplicated event appears in an agenda view or it should not be displayed

Anomalie #3931 : Taking into account the 'Cross-origin resource sharing'

The 'Cross-origin resource sharing' is taken into account in the API v2

Anomalie #3930 : VPGO: Display of attribute descriptions

We no longer see attribute descriptions in the VPGO editors

BUILD 200612 7

Anomalie #3963 : "Concatenation of text" heading in forms

The output is no longer available.

BUILD 200610 7

Anomalie #3955 : Schedule display: linked events

In some cases, linked events appear twice in the planner.

Anomalie #3954 : Printing resource editors

The printing functionality is not possible when an editor contains a list of event.

Anomalie #3952 : Event editor in Spanish

In event editors, the time does not appear if the selected language is Spanish

Anomalie #3947 : VPGO: List of resources in a resource editor

For some settings a list of resources in a resource editor is never filled.

Anomalie #3945 : VPGO: Event duplication problem

If we duplicate an event and we change dates (start or end date) then a error occur.

Anomalie #3944 : VPGO: Unable to create an event in an agenda view

Unable to create event in calendar view

Anomalie #3938 : Sort schedule line

When the sort item is not visible, the sort is not correct

Anomalie #3937 : Heading: Incomplete label

In some cases, the name of the headings is incomplete

Anomalie #3935 : Import / Export: automatic consideration of time format

Hours in US format are not taken into account

Anomalie #3935 : Import / Export: automatic consideration of time format

Hours in US format are not taken into account

Anomalie #3934 : Active view

In some cases a "floating" view remains active and imposes the menus whatever the view.

BUILD 200603 7

Anomalie #3932 : Launch of VP

Unable to launch VP on a client computer whose locale is not known managed by VP

Anomalie #3928 : Compact events issue

It is impossible to compact events.

Anomalie #3927 : Duplication of multiple events

Simultaneous duplication of multiple events do not work correctly.

Anomalie #3925 : VPPORTAL: Signature heading

If a signature heading is displayed on another tab than the main one, it is then not possible to use it.

Anomalie #3922 : Evenet deletion

In some case, the deletion of the parent event do not delete the chlid events

Anomalie #3918 : VPGO: boolean headings in agenda view

If a boolean heading is displayed in an event description of an agenda view, a HTML code is then displayed instead of a checkbox.

Anomalie #3917 : Summary of events: update issue

Summary of events and calculated date headings are not updated correctly.

Anomalie #3916 : VPGO: IOS Notifications

Notifications do not work on IOS devices.

Anomalie #3914 : VPPORTAL: impossible to change the icon size in an Agenda view

It is not possible to choose the size of an icon in a Agenda view.

Anomalie #3912 : Import/export: creation issue

When an event is created automatically after creating a resource, the event import/export is not triggered.

Anomalie #3911 : Access to private data

Even if the option is enabled, admin users do not have access to private data.

Anomalie #3909 : VPGO: Read Code 128

CODE128 format not processed correctly

Anomalie #3908 : SQL request issue

In some cases, if the execution of a SQL request is too long, then the application crashes.

Anomalie #3903 : Editor: buttons issue

When the scrolling bar is displayed, some buttons are not enabled.

Anomalie #3896 : Service import

In some cases, the selected value is not taken into account in the editor used for triggering the imports.

Anomalie #3837 : VP: Display of photos in the planning view

On MacOS when you display a photo (attachment section) in the resources area of the schedule view, this area turns blue.

BUILD 200511 7

Anomalie #3899 : VPPORTAL: Groundback color on event lists

The groundback color on events list was not displayed.

Anomalie #3897 : Email import

Email import doesn't work.

BUILD 200506 7

Anomalie #3894 : Editor : resource list

The option "Display the edit pane" is displayed even if not enabled

Anomalie #3893 : API V1: call issue

In some cases, the API call is not valid

Anomalie #3889 : VPGO, VPPORTAL: Default value issue

When creating an event (level 2 or more), form headings are not updated with their default values (\$USERNAME,...)

Anomalie #3887 : VPGO: Search on a list of more than 1000 resources

No results are displayed when a search is done on a list of more than 1000 resources

Anomalie #3884 : VPPortal: Modification rights on rich text

It is always possible to modify a rich text heading even if a user doesn't have the right to do it

Anomalie #3882 : VPPortal: Rounding error on non working event duration

In some cases, there is a rounding error on non working event duration (1 or 2 minutes less)

Anomalie #3880 : SQLServer : Restoring a vps file

In some cases, it is not possible to restore a vps file

Anomalie #3877 : VPS: data recovery issue under SQL server

Impossible to restore VPS from SQLserver on a new SQLserver

Anomalie #3875 : VPGO: Add a picture when creating an event

If a picture is added when creating a new event, the event is not saved correctly. The picture is still uploaded on the server.

Anomalie #3874 : VPGO: reading timeout for some queries

When reading events, the connection timeout is used for the entire transaction. This value being taken into account, this leads to untimely disconnections.

Bug correction available in VPGO> = 1.0.14

Anomalie #3865 : Automatic QRCode generation

In some cases, It is not possible to generate the QRCode automatically

Anomalie #3861 : VP7 Admin : User list issue

In some cases, the list of the users is not displayed properly

Anomalie #3858 : VPGO: Issue to launch other mobile app from vpgo

On Android devices, it is impossible to launch other mobile application installed on the smartphone/tablet (from a geolocation heading)

Anomalie #3854 : Mandatory heading

When creating a resource with a mandatory heading, if this heading is not filled, there is no indicator marking this mandatory field in the resource editor.

Anomalie #3849 : VPPORTAL: Dashboard colour issue

When a colour is modified in a dashboard, the background colour is now modified. The text colour is calculated automatically depending on the background colour.

Anomalie #3847 : Web Calendar

There is a gap of 2 hours when interfacing data with Google calendar

Anomalie #3846 : VPGO: heading value

The value of a heading resource which is linked (displayed in an event editor) was replaced by another heading value of the resource.

Anomalie #3845 : Events shift when displaying the print preview of a schedule view

In some cases, a shift occurs when displaying the non working days

BUILD 200402 7

Anomalie #3843 : VPPORTAL: Error in Kanban view

There is an error in the Kanban view if we are not using a sort item.

Anomalie #3842 : Filter: used by

In some cases, the "used by" function of filters causes an internal error

BUILD 200401 7

Anomalie #3839 : Selection filter issue

In some cases, an error message appears when applying a selection filter to a view.

Anomalie #3838 : Valuation items configuration

Impossible to modify some values.

Anomalie #3836 : VPI file import

In some cases, the VPI file import is not fully uploaded.

Anomalie #3828 : Statistics reports in the Admin center

Statistics reports in the Admin center are not displayed anymore.

Anomalie #3827 : Error message when editing events through the default editor

An error message appears when a default event editor is the only one available and if the "always available" option is not activated.

Anomalie #3826 : Google drive: files access issue

The access to any Google drive was not working.

Anomalie #3825 : Text on duration bar issue

In some cases, the text on duration bars is not displayed properly.

Anomalie #3814 : VPGO: Event lists

When no event has been created and assigned to a resource, it is then not possible in VPGO to create and display any new event for that specific resource.

Created events disappear automatically from the list.

It requires to close the event list and re-open it to see the created events.

Anomalie #3810 : Resource printing: details mode issue

It is not possible to print events of a resource when the details mode is selected in Visual Planning

Anomalie #3802 : Resource printing: details mode issue

It is not possible to print events of a resource when the details mode is selected in Visual Planning

Anomalie #3801 : VPGO: Issue to upload a picture in an attachment field (Image gallery mode)

In VPGO, it is not possible to upload an image in an attachment field using the 'Image Gallery' mode.

Anomalie #3799 : VPGO: issue to display pictures on IOS

On IOS, icons and pictures are not displayed due to some IOS limitations.

Anomalie #3791 : Issue to create new events

In some cases, it is not possible to create new events

Anomalie #3789 : VPPortal: Issue when modifying an event duration

When the duration of an event is modified in an event editor, the end date is instantly recalculated. This can cause problems if the value is long. There is a time delay which allows the user to modify the duration and, only once he has finished, to recalculate the end date automatically.

BUILD 200304 7

Anomalie #3786 : Some events don't move when shifting multiple events

Some events don't move when shifting multiple events

Anomalie #3779 : Single choice list: conditions of association

The association items list is not always correct.

Anomalie #3774 : Import-export: son events update from the father one

In some cases, it is not possible to identify the father event thanks to its UID

Anomalie #3769 : Calendar set up issue: access and configuration are not allowed

It is not possible to configure the hourly models as well as hourly and daily calendars.

BUILD 200214 7

Anomalie #3762 : Visual Planning launching from local installation

When launching Visual Planning from a local installation which is not the default one, the start screen was not available. It was then impossible to launch and use Visual Planning.

Anomalie #3751 : Calendar: Configuration of the specific days section

When creating a daily calendar, it is not possible to select any period type to define specific days.
